behind the collection THE PROCESS

Long before the launch of a collection, our team of creatives start their thought process by creating a concept being the fundament of the season. These influences are translated into products, later to be combined in various settings.

Behind the COLLECTION

Each year, Dôme Deco launches two main collections. Starting from a certain concept, our team of experts begin their process of brainstorming. Discussing every aspect from shapes and design to fabrics and materials. The focus of our product developers and designers being innovation, uniqueness and premium quality. Creating refined luxury whilst always expanding our horizons. All to achieve an impeccable new collection, true to Dôme Deco's aesthetics and personality.

As a producer and designer of full interior collections and concepts, the complete image we present is our main priority. Before our new products are set up in our showroom, we rebuild it to match the collection's concept. Everything from walls to flooring, all to give you the perfect perception of our new collection and the passion and creativity that went into it. All of our new products and settings coming into their own perfectly, ready for you to discover.

CERRO centerpieces

Our Cerro centerpieces evolved out of an in-house design by
Dôme Deco's art director Laura Peters.

Inspired by the geometric shapes of Cubism. Translated from
2D art to a 3D object by bringing the right balance with colour
and use of materials. A striking, imposing shape in a timeless
material and refined colour.

KATLA hurricanes

The Katla hurricane, referring to Iceland's largest volcano, is characterised by its architectonic construction and minimalist appearance. A raw and natural source of light-shielded by a metal casing. Representing the crater and floating lava in conjunction with the crevasse.

A visual spectacle offering you a variable structural look from different perspectives. Available in three sizes. Made of either a raw metal with brown satin glass or a brown powder-coated metal with grey satin glass.

Designed by Dôme Deco's in-house designer Gilles Knaepen.

JAVA shelf

Based on Paul Apers' extensive and in depth knowledge of the furniture industry, we set out to develop a modular shelving system that serves a multitude of applications.

Be it a single unit in a private study, a combination in a dining room setting as presented here, or an even more elaborate presentation for in a hotel lobby, the Java shelf will cater to your specific needs.

Because of its modular character, it also comes in small packages, making it very easy to transport and handle.
